

Fall 2024 Course Registration Information

PhD Bioengineering

Congratulations on your acceptance to Northeastern University!

Currently, we suggest that you register for Fall 2024 courses. Before registering for classes, please make sure to watch registration instructional videos at the following link:

<https://registrar.northeastern.edu/article/new-registration-experience/>

The Student Hub is the portal for course registration. This can be accessed at:

<https://about.me.northeastern.edu/>

To be able to register for classes, admitted students need to first confirm their enrollment and pay their enrollment deposit. Students may do so by logging into their [application portal](#).

PhD Bioengineering Curriculum

Please review the catalog for more information on your academic curriculum:

<http://catalog.northeastern.edu/graduate/engineering/bioengineering/bioengineering-bachelors-degree-entrance-phd/#curriculumtext>

If you are entering the program with an MS degree in a relevant field, please refer to the Advanced Entry tab. Core courses BIOE 6200 and BIOE 7000 are also required for Advanced Entry students. If you have sufficient mathematics background, you may submit a request for BIOE 6200 to be waived.

Fall 2024 courses are available to view at [this link](#).

When searching for courses at the above link, please make sure to select “**Fall 2024**” for the term, “Bioengineering” for subject, and “Graduate” for course level. Full-time students must register for at least two courses (8 Semester Hours) and part-time students must register for at least one course.

What courses should I enroll in?

You should enroll in BIOE 6200 Math Methods, as this course is only offered in the Fall semester, alongside a relevant 5000 level course or BIOE 6100 Medical Physiology.

As two core courses together in your first semester is a heavy lift, we do recommend taking BIOE 6200 + a 5000 level course in the Fall semester instead of BIOE 6100 + BIOE 6200.

In the Spring, we recommend BIOE 7000 Principles of Bioengineering, as this course is only offered in the Spring semester, alongside BIOE 6100 Medical Physiology or a relevant 5000 level course dependent on your Fall enrollment.

Additional Information

- Students can easily add or drop courses using the online registration system for the first two weeks of the term. If you have questions or difficulties with the above instructions, we can assist you upon your arrival.
- The BioE Department Graduate Orientation will take place on September 3, 2024. The agenda and further details will be sent out closer to the time.

Billing

PhD students who receive funding (SGA) have their tuition and NUSHP fee waived. However, you are responsible for all other mandatory student fees.

If you choose to register for courses early, you will receive a bill for tuition, but there is no action required from you. The college will waive this fee as detailed in your offer letters (note this may not appear on your billing statement until several weeks into the semester). You will still get billing notices as these are automatically generated, but you should not respond to these.

If you have questions about payment, please contact c.pridmore@northeastern.edu, coe-phd-gradadvising@northeastern.edu or the [Student Financial Services office directly by submitting an inquiry](#).

If you have any specific questions for the Bioengineering Department, please contact the department Academic Operations Manager, Caroline Pridmore at c.pridmore@northeastern.edu

We wish you all the best and look forward to working with you!

Sincerely,

The Bioengineering Department
